## Harvest Update

July 1, 2015

### ALFALFA

The Pacific Southwest (PSW) is about midway through 5th cutting Alfalfa harvest. Due to high temperatures during both growing and harvest, we expect quality to vary. Monsoon season is approaching in the PSW. We will see a wide range of weather patterns across the region.

Oregon, New Mexico and Utah are beginning to wrap up 1st cutting harvest. Weather continues to pose a challenge, limiting green hay. In Washington, growers are concluding 2nd cutting Alfalfa harvest.

### TIMOTHY

Anderson Hay personnel are securing Timothy hay inventory in the Kittitas Valley and Columbia Basin. Due to record heat, we are seeing a wide variation in grades. Tonnage in the upper end hay grades continues to be limited.

### STRAW

The Fescue straw harvest is moving along in the Willamette Valley. As with hay, high temperatures have had adverse effects on this year's crop. Straw yields are down across the valley.

### OFFICE CLOSURE

We will be closed Friday, July 3rd in celebration of Independence Day.
